

WordWise

Use the clues to identify vocabulary terms from Chapter 11. Write the words on the lines. Then, find the terms hidden in the puzzle and circle them.

Clues

1. Pattern of inheritance in which both alleles contribute to the phenotype of the organism
2. Describes a cell that contains both sets of homologous chromosomes
3. The physical characteristic of an organism
4. Describes an organism that has two identical alleles for a particular trait
5. A specific characteristic, such as seed color, that varies from one individual to another
6. The offspring of a cross between parents with different traits
7. The different forms of a gene
8. Describes the two corresponding sets of chromosomes that come from the female parent and the male parent
